The screenshot displays a database management interface with a SQL editor and a results grid. The SQL editor contains three queries: a CREATE TABLE statement for 'Salesman\_master', an INSERT INTO statement with four rows of data, and a SELECT \* FROM statement. The results grid shows the output of the SELECT query, displaying the columns S\_no, S\_name, City, Pincode, State, Sal\_amt, Tgt\_to\_get, Ytd\_sales, and Remarks for the four inserted rows.
